

Day 1 Pyramid Problems

Input 1 - Imagine that in the pyramid, treasure is hidden - in order to unlock the door and enter - you need to find all the numbers that sit on each block.

Input 2 - Look at this completed pyramid. Can you work out how it works? Why do certain numbers sit in certain places?

Activity - Have a go at filling in some addition pyramids. You need to start at the bottom and work up. There are different sized pyramids - 3 block based, 4 block based and a 5 block based pyramid.
